Equipe Rapide 2017 Tire Class Season Points

This is just a demonstration of a different type of scoring system utilized around the country. Instead of assigning points by finish. It calculates the percentage of each driver. Points are awarded based on percentage with the winner of each event earning 100 points and the rest of the drivers in the class getting a percentage based upon margin. This is determined by dividing the winning score by your score (WS/YS=%). For example, if the winning time in the autocross is 60.000, that driver would get 100 points. A driver that scored a time of 60.001 would get 99.99 points and a driver that scored a time of 61.000 would get 98.36 points.

The advantage of this type of scoring system. It awards people that run at least 7 of the 9 events in the same class. Is a true comparison of the base group of drivers in a class that truly are competing against each other event after event. Takes out the ringer effect when a part timer comes in and steals points.

The disadvantage are that it might reward a person that shows up each week with a possible trophy. Under the points per place scoring a part timer could accumulate higher points than a regular. Additionally the percentage system is math intensive and makes it difficult to calculate what times one needs at the end of the season to catch or keep ones place in the standings.

This is only a demonstration of another possible scoring system. The points by place system is still the official scoring system.

Rank	Driver	Event 1		Event 2		Event 3	Event 4	Event 5	Event 6	Event 7	Event 8	Event 9	Event 10	Total	Events	Average	Trophy	**Top 7**
1	Paul Kurtz	26.865	100.000	42.284	100.000									200.000	2	100.000	N	**200.000**
2	Andy Cost	27.826	96.546	43.397	97.435									193.982	2	96.991	N	**193.982**
3	Jeffrey Walker	28.403	94.585	42.969	98.406									192.991	2	96.495	N	**192.991**
